Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/644,122

Applicant(s)

ZERHUSEN ET AL

Examiner

Jong-Suk (James) Lee

Art Unit

3673

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 August 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-30 is/are pending in the application.
- 4a) Of the above claim(s) 16 and 17 is/are withdrawn from consideration.
- 5) ☒ Claim(s) 27-30 is/are allowed.
- 6) ☒ Claim(s) 1-15, 18-26 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

DETAILED ACTION

1. The amendment filed August 3, 2004 has been entered.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "corridor" in claim 7, line 4.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1, 4, 5, 21 and 22 are rejected under 35 U.S.C. 102(e) as being anticipated by Pierzina (US 6,279,795).

Pierzina discloses a shoulder strap (24) for a rifle (12) comprising a support surface/bottom part of the rifle (12), a side rail/strap including a siderail covering having a body comprising a flexible material, which is made of polypropylene/foam, having a plurality of adjustably sized notches (34), the body having a longitudinal axis and a first longitudinal end

Art Unit: 3673

(30), a second longitudinal end (32) and a body centerline extending within the body between the first and second longitudinal ends, the body having a first position in which the body centerline is straight, and the body having a second position in which the body centerline curved as depicted in Fig. 5, wherein the body flexes about an axis that deviates from being parallel with the longitudinal axis of the body (see Figs. 1-6; col.2, lines 33-67; col.3, lines 1-22).

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-3, 5-12, 14, 15, 19-26 are rejected under 35 U.S.C. 102(b) as being anticipated by Japanese Patent Application (JP 10-266510).

Japanese Patent Application'510 discloses a flexible side/hand rail for a step comprising a support surface/wall, a side rail including a siderail covering having a flexible body (2A2) including a flexible material having a plurality of laterally extending apertures/notches and having a central rail member aperture wherein an articulated rail member (2A1) positioned inside the flexible body through the central rail member aperture, the flexible body having a plurality of repeating segments along a longitudinal axis of the body, each repeating segment is pivotable relative to adjacent repeating segments as depicted in Fig. 5 (see Figs. 1-7; English translated abstract).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 13 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese Patent Application'510 in view of Cambell, Jr. et al (US 5,875,792). The teachings of Japanese Patent Application'510 have been discussed above.

Japanese Patent Application'510 fails to disclose or fairly suggest the flexible material of the body is made of foam. Cambell, Jr. et al discloses a bendable foam covered rod-like article comprising of a flexible body including a flexible material/foam (14) and a rail member positioned inside the flexible body as depicted in Fig.1 (see col.4, lines 9-67; col.5, lines 1-17).

Therefore, in view of Cambell, Jr. et al, it would have been obvious to one of the ordinary skill in the art at the time the invention was made to replace the covering with the foam material in order to protect the object to be contacted with and enhance the softness of the rail covering.

With respect to the triangular shaped in cross section for the laterally extending apertures of the flexible body, it would have been obvious to one of the ordinary skill in the art at the time

Art Unit: 3673

the invention was made to have a triangular cross section for the apertures of the flexible body in order to provide the more freedom of the flexibility to the body by shaping the side rail covering to be a triangular shape.

Response to Arguments

9. Applicant's arguments filed August 3, 2004 have been fully considered but they are not persuasive.

With respect to the limitation, “a support surface, and a siderail”, it is understood that the supporting surface for any purpose and a siderail which is secured in side of the supporting surface insofar as the preamble, “A patient support” is not positively recited in the body of the claim to be positively so that patentable weight is not given to the preamble.

With respect to the argument that the proposed central rail member of JP application’510 does not extend within any proposed notches and it appears that the ambient air is the only material within the proposed notches, it is understood that the corridor (which is not supported by the specification) may be empty “corridor” being conformed by an ambient air as Applicant presented.

With respect to the argument that the combinations of JP Application’510 and Campbell reference, an artisan within the ordinary skill in the art would have replaced the material for siderail with the foam material insofar as Campbell’s “rod-like” article is made of the form material and bendable.

Allowable Subject Matter

10. Claims 27-30 would be allowable over the prior art of record.

Conclusion

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jong-Suk (James) Lee whose telephone number is (703) 308-6777. The examiner can normally be reached on 6:30 am to 3:00 pm, Monday thru Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather C. Shackelford, can be reached on (703) 308-2978. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
